## Arora ATLAS® / TRAX Smart Restroom

TRAX SmartRestrooms solutions give insight into the status of your restroom and overall custodial operation by providing predictive, real-time, and historical data analysis. Turn your restrooms into Data-Collection Central with smart dispensers, throughput counting, staff location data, guest feedback surveys, smart stalls, and more.

SmartRestroom is a smart technology-driven solution that gathers key data from a restroom and utilizes it to fit the needs of each client. As every facility has different needs, there are features for clients to choose from including, but not limited to:

+ Restroom user throughput
+ Restroom user feedback
+ Automatic cleaning alerts
+ Smart stall occupancy
+ Passive custodial staff monitoring

The solution is supported by a user interface that enables clients to:

+ View restroom details
+ View custodial staff details
+ Create cleaning alerts
+ View cleaning alert logs

Ultimately, TRAX SmartRestrooms solution brings great value to clients by helping to improve the operational efficiency of custodial teams by:

+ Providing real-time maintenance data
+ Assisting in streamlining cleaning activity and inventory management
+ Providing accurate reporting data to administrative and supervisory staff

SmartRestroom can help facilities develop the best possible facility maintenance plan, resulting in improved overall efficiency and decreased costs.
